SUMMARY

Recent Computer Engineering graduate from Akdeniz University with hands-on experience in full-stack web development and AI-powered systems, seeking a junior software developer role. Led a research project funded by TÜBİTAK 2209-A, building an AI rehabilitation platform from architecture to deployment. Recently spent four months in the United States, gaining international exposure and cultural adaptability.

EXPERIENCE

Altinyıldız Classics

Jul 2026 – Present | İzmir

Software Developer Intern

Developing backend services for e-commerce systems using .NET and PostgreSQL, focusing on RESTful API design, reliable data modeling, and query optimization. Building internal automation tools that streamline retail and operational workflows, reducing manual effort and improving data accuracy across teams.

VB T Yazılım

Jun 2026 – Jul 2026 | Remote

Software Developer Intern

Completed a structured, mentor-guided software development program covering enterprise architecture, cloud technologies, relational databases, software testing, and agile workflows. Applied these through hands-on tasks, gaining experience with version control, code reviews, and production-grade development practices.

RevloAi

Dec 2025 – Feb 2026 | Remote

Frontend Developer Intern

Built responsive Angular pages and reusable UI components, integrating component libraries and third-party packages. Improved state management and component architecture, collaborated on UI/UX refinements, and contributed to a cleaner, more maintainable frontend codebase.

Talya Bilişim

Jun 2025 – Aug 2025 | Antalya

Software Developer Intern

Contributed to Node.js REST API development and Angular frontend features within a professional team. Implemented and tested endpoints, worked with relational data, and followed real-world workflows including version control, code reviews, and agile sprints.

PROJECTS

PhysioVision – AI Rehabilitation Platform

Flask | React | TensorFlow | PostgreSQL

Team Leader & Backend Architect | TÜBİTAK 2209-A Funded Project

AI-powered rehabilitation platform using MediaPipe pose detection and LSTM exercise classification (approximately 82% validation accuracy) for real-time patient form evaluation across 13 exercises. Multi-role system (patient/therapist/admin), React Native mobile app, Redis caching, and Docker deployment.

Hotel Website Builder & Cloner

Node.js | Angular | MongoDB

Hybrid platform for hotel site generation with template-based creation and advanced cloning (Puppeteer, Cheerio), plus secure file handling and structured error management.

AI-Powered Hotel Chatbot

Node.js | Multi-LLM

Multilingual chatbot integrating LLaMA, Mistral, and GPT models with dynamic model switching, chat history management, and a responsive web interface.

Football Matchmaking Web Application

.NET 8 | React | PostgreSQL

Full-stack product with JWT auth, SignalR real-time communication, a rating system, and Swagger-documented, security-focused APIs.

CORPORATE & VOLUNTEER EXPERIENCE

Çelebi Ground Handling

2021–2023 | İzmir

Operations Officer

Corporate airport operations in a fast-paced environment; strengthened teamwork, adaptability, and crisis-handling under pressure.

ANTÇEV — Antalya Çağdaş Eğitim ve Kültür Vakfı

2025 | Antalya

Volunteer Technology Instructor

Delivered computer and digital literacy training to primary school students.

EDUCATION

Akdeniz University

2023–2026 | Antalya, Türkiye

B.Sc. in Computer Engineering

İzmir University of Economics

2021–2023 | İzmir, Türkiye

Computer Engineering Coursework — Transferred to Akdeniz University

SKILLS

Technical: Python, Java, C#, .NET, Node.js, SQL, JavaScript, Linux, Angular, TypeScript, Next.js, React

Other: Project Management, Testing & Debugging, Data Analysis, Cyber Security Basics

Languages: English (C1 Advanced), German (A2 Elementary)
